

WORK EXPERIENCES

BRAFITEC Scholarship Awardee

CAPES
Sep 2022 - Present

- Student of BRAFITEC (BRASil France Ingénieur TECnologie) exchange program, developed in the scope of cooperation between Brazil and France governments.
- Financed by the Brazilian Coordination for the Improvement of Higher Education Personnel (CAPES), which offers scholarships to about 200 students who have excelled in Brazilian engineering programs.

Project Researcher

ENERMAN
Sep 2022 - Jan 2023

- Researched and developed a Bayesian Network model to create risk assessment analysis of an energy prediction tool (ENERMAN).
- Used Python, especially pgmpy and matplotlib libraries, to build a bow-tie model for risk analysis.

Quality Assurance Engineer

CESAR
July 2021 - Aug 2022

- Developed English communication skills in an international environment with a global team.
- Created and executed test plans for functional and non-functional manual tests.
- Created UI automated tests using Swift language and XCUITest framework on iOS devices.

Software Test Engineer

Motorola
July 2020 - July 2021

- Internship from July 2020 to April 2021
- Full-time Test Engineer from April 2021 to July 2021
- Executed manual test cycles with regression and exploratory functional tests.
- Execution and maintenance of automated test scripts for Android using Java and UIAutomator.
- Investigation and tracking of issues, opening change requests (CR's), and retests with JIRA.

EDUCATION

Mechatronics and Complex Systems

2022 - 2024

Institut Supérieur de Mécanique de Paris (ISAE-Supméca)

B.Sc. in Mechanical Engineering

2018 - 2024

Federal University of Pernambuco (UFPE)

Test Automation, IT Extension

2021 - 2022

CESAR School

SKILLS

Soft

Problem solving Cultural sensitivity
Adaptability Team Working Collaboration
Communication

Over 2 years

Python Git GitHub

Over 1 year
